

Patient Information Sheet

Semen Analysis

Please follow these instructions carefully:

1. Collect specimen a minimum of 2 days and a maximum of 7 days after your last ejaculation.

2. Collect the **ENTIRE** sample by means of masturbation. Other methods, such as interruption of intercourse, are not suitable as there can be loss of the first portion of the specimen.

3. **DO NOT** use condoms, artificial lubricants, talcs, etc, as these will interfere with the test.

4. Collect the specimen in the specially provided container. **DO NOT** expose the container to extremes of temperature before or after specimen collection. Sample should be kept between 20°C and 37°C (room temperature = 20°C).

5. Label container with your:
 - Surname
 - Date of Birth
 - Given Name
 - Time and Date of Collection

6. Complete the details on the reverse side of this form and deliver with the specimen and doctor request form.

7. For both Fertility and Post Vasectomy Testing, please deliver to your nearest Dorevitch Laboratory listed below within 45 minutes of collection.
